

## Programme & Project Assurance

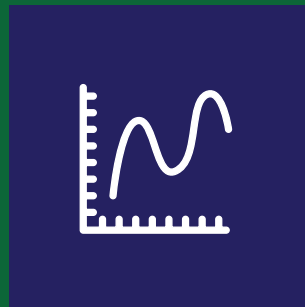

### A Critical Friend

### Risk & Issue Mitigation

### ROI Analysis

### Delivery Assurance

## Would You Benefit From An Independent Perspective?

Successful **programme and project delivery** is more important than ever for organisations operating in a demanding economic climate. Programme assurance **plays a vital role** in confirming that major investment programmes are on track and will help with identifying any early actions required to **mitigate issues and future risks**. We can help you with:

### Independent Assurance

We provide an **independent assurance** service that significantly improves your chances of successful delivery. We will provide you with a **clear sense** of whether your programme is on track to accomplish its objectives and **what actions are needed** to ensure programme goal delivery.

### A Flexible Approach

Our approach, methodology and tools are designed to be flexible to **meet the specific needs of your business** and integrate with the methodology that suits your **transformation programme**. We will work in partnership with you to understand your organisation and its goals, assuring against these.

### A Critical Friend

We have **vast experience** of running and assuring programmes and projects using both **traditional and agile methodologies** to deliver the desired outcomes. We will act as a critical friend, providing you with **open, honest feedback and guidance** to ensure you are on track to deliver.

## Programme & Project Assurance

### Why Issured?

#### 01 Consistent & Robust

Using a consistent, robust, and practical approach, we concentrate on the key issues and risks in each phase of the programme lifecycle. We employ an interview-based approach that allows us to gather information from your key delivery leads to get to the heart of the key issues without demanding excessive input from you, your staff, or your partners.

#### 02 Supporting Engagement

We will support you to ensure that all of your stakeholders are genuinely aligned and committed, identifying any that may be passive or acquiescent, giving advice and guidance on how to manage any issues this causes. We will also help you to understand methods of increasing stakeholder engagement to give you maximum buy-in.

#### 03 Detailed Reporting

Regular reviews of core activities including overall governance, risk, and issue management, change management and communications will be undertaken and provided to you in detailed reports. These are designed to provide you with an overall health check of the programme and associated projects in terms of being on track to deliver on time, to quality and within budget.

#### 04 Extensive Experience

Our assurance service is delivered by a highly skilled team of assurance professionals who have many years experience in managing large complex transformation programmes and providing programme assurance for public and private sector organisations. We understand the challenges of programme delivery and have developed tools, processes and applications to address these.
