

## Secure and Tamper Evident Video Interviews

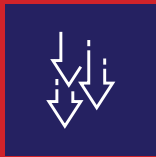

### Reduce the length of your claims and fraud investigations

More effective use  
of investigators time

More efficient  
investigative process

Reduced cost of  
operations and  
investigations

Increased confidence  
in evidential material

Quick and low-cost  
to implement

Easy to use on  
any device

Remote interviewing is a key investigative component for modern counter fraud teams and Mea: Connexus provides a next gen solution to empower our investigators to get the best results. The product provides us with a highly secure and intuitive method by which to manage, conduct and maintain remote interviews, building on prior existing solutions with a range of innovative new features. Most importantly, we are enjoying working in true partnership with Issured, who have taken a collaborative, knowledgeable and agile approach to ongoing product development.
